Quilpué, Chile

Fullstack Web Developer talented in Frontend, being part of SCRUM development teams. I have participated in Bootcamps for Fullstacks using technologies as ReactJS and NodeJS. I have a facility to learn when it's about Javascript, it is my favourite programming language. The experience taught me to improve many amateur programmer issues when they work as a team, taught me to learn so much in a short time, to have confidence in me and my skills and learning more deeply the technologies like Angular JS.
